# RIA MAITRA

Analytics Specialist • GenAI • AI Agents • Data Science
*9113430006 | maitraria15@gmail.com | linkedin.com/in/ria-maitra-11a767144 | github.com/maitraria15-dot/CardAnalyst-AI*

## SUMMARY

Analytics Specialist with a **PGDM in Management** and **4+** years of experience delivering **Data Science, Generative AI, and Machine Learning** solutions across top-tier financial services and enterprise clients **(Citi, Visa, Morgan Stanley)**. Hands-on expertise in building Agentic AI workflows, LLM applications, custom NLP pipelines, and data governance frameworks. Proficient in Python, SQL, LangChain, LangGraph, and Advanced Prompt Engineering, with a proven track record of automating complex financial workflows and **driving multi-million-dollar optimizations.**

## SKILLS

- **Generative AI & LLMs:** LangChain, LangGraph, RAG Pipelines, Vector Databases (Chroma/FAISS), Prompt Engineering, Agentic AI, Claude/ Codex, LLM Benchmarking (Gemini, Mistral, Cerebras, OpenAI, Claude Opus)
- **Data Science & Machine Learning:** Supervised/Unsupervised Learning, XGBoost, Random Forest, Linear/Logistic Regression, NLP, Feature Extraction, Model Evaluation, Entity Resolution, Rule-based & ML Classification, NetworkX Graph Traversal
- **Programming & Tools:** Python (Pandas, NumPy, Scikit-Learn, Regex), SQL, Excel, GitHub, Azure ML Studio, Azure DevOps
- **Domain Knowledge:** Financial Analytics, Card Portfolio Optimization, Data Governance, Contract Automation

## GENAI PROJECT

**CardAnalyst AI -** Upload any credit card document, ask any question, get instant structured competitive intelligence – powered by AI.
*github.com/maitraria15-dot/CardAnalyst-AI*

## EXPERIENCE

### 1. Analytics Specialist | Zenon.ai, Noida *Mar'22 - Aug'26*

***a.*** **Client: Citi | Rewards Optimization & Portfolio Analysis (~ 24 Months)**

*Tools: SQL (IBM Db2), Excel*

- Performed root-cause analysis for rewards leakage across credit card programs by reviewing T&Cs, and transaction data, supporting investigation of a client-estimated **~$40M** leakage. Identified **25+** previously unclassified cash-advance merchants contributing to **$10M+** in potential savings.
- Conducted customer profiling across products, spends, credit limits, acquisitions, MCC-based spend distribution, cash advances, fees, interest, and transaction behavior to support competitive benchmarking and product strategy, with insights including identification of high-impact products (e.g., Costco Anywhere Visa contributing **~213B** in card spend).

***b.*** **Client: Morgan Stanley (E*TRADE & Morgan Stanley at Work) | Financial Reports *(~ 12 Months)***

*Tools: SQL (IBM Db2), Excel, Python*

- Owned and validated business-critical financial reports (e.g., AUM) and dashboards (e.g., NNA), and documented finance dashboards to help business teams understand metric definitions and underlying logic. Automated **2** high-frequency reports using Python, reducing reporting effort by **~50%.**

***c.*** **Clients: Johnson & Johnson & Visa | Contracts AI & NLP Automation *(~ 5 Months)***

*Tools: Excel, Python (Anaconda)*

- Worked on Python-based automation pipelines to extract, translate, classify, and validate contractual clauses from PDFs, Word, and Excel files using OCR, NLP, and rule-based logic, reducing manual contract review effort by **~ 40-50%.**
- Worked on NLP and graph-based workflows using recursive parse-tree traversal and NetworkX graph to convert **50+** complex contractual clauses into simpler policy components, improving accuracy of entity and use-case identification and reducing manual policy interpretation effort by **~40%.**

***d.*** **Client: doForms | AI Integration & Form Intelligence *(~ 6 months)***

*Tools: Python, Claude Opus (Anthropic), Gemini, Mistral, Cerebras, OpenAI*

- Built a PDF/image-to-English pipeline using LLM APIs to extract and interpret form content, benchmarked multiple LLMs (**Gemini, Cerebras, Mistral, Claude, OpenAI)** across sample PDFs and concluded Claude Opus delivered the best accuracy.
- Developed a natural language-to-JSON pipeline that takes user input and generates form definitions in doForms' exact JSON schema structure, enabling structured form creation from unstructured text.
- Created 200+ pages of UI Specification Documentation with the help of Claude code.

**e. Client: Lendmark | Data Governance & Exploratory Data Analysis *(~ 6 Months)***

*Tools: SQL (SQLSMS), Excel, Python (Azure ML Studio), Azure DevOps Boards, ChatGPT (Prompt Engineering)*

- Owned and delivered data governance initiative by rationalizing reports across Finance, Risk, Operations, Marketing, and Compliance, defining and standardizing 15+ critical KPIs, building metadata documentation for 20+ priority tables (including PII classification), and establishing a 6-month governance roadmap.
- Performed exploratory data analysis on Direct Mail Solutions (DMS) campaign data to assess data quality, analyze month-over-month performance trends, and identify potential features for response model development.

### 2. Data Analyst Intern | DAKSH India *Feb'21 - Apr'21*

*Tools: Python (Google Colab)*

- Used Python (regex) to process unstructured court data, extract patterns, and build rule-based logic to categorize petitioner and respondent entities into 4categories, improving data structure and usability.

### 3. Data Science Intern | Flip Robo Technologies *Jul'20 - Jan'21*

*Tools: Python (Google Colab)*

- Worked on NLP and machine learning projects using Python, including text summarization and classification, involving data preprocessing, feature extraction, and model evaluation.

## QUALIFICATIONS

- PGDM, Major in Marketing and Minor in Finance, XISS, Ranchi *2017 - 2019*
- B.Sc., IHM, Bhubaneswar *2012 - 2015*

## CERTIFICATIONS

- Complete Agentic AI Bootcamp with LangGraph and LanChain, Udemy. *May'26*
- AI Tools Workshop, Be10x *May'26*
- Prompt Engineering, IBM *May'24*
- P.G Program in Data Science, Machine Learning and Neural Networks, DataTrained *Feb'20 - Jan'21*

## CORE COMPETENCIES

- **Client Communication:** Strong ability to communicate analytical insights and build relationships with clients
- **Analytical Storytelling:** Proficient in presenting data findings in a simplified manner through storytelling.
